

TAG-IT, LLC, in conjunction with Emergent Online (EOL) proudly announces that, effective March 31, 2008, all EOL integration and hosting clients will be seamlessly transferred to TAG-IT.

After an industry-wide search for a partner, Paul and Peter Ghostine, EOL's co-founders, found the perfect fit in TAG-IT. The transfer of EOL's integration business to TAG-IT will further strengthen TAG-IT's capabilities, while continuing to provide the unparalleled quality of service all EOL customers have come to expect. Through this acquisition, TAG-IT has enhanced its ability to offer even more effective application access and integration solutions built around a virtualization model.

TAG-IT is a wholly owned subsidiary of Asbury Communities, the 14th largest Senior Living provider in the United States. The technologies used in our data center, revolving around application deployment, infrastructure solutions such as virtualization and storage, as well as hosting services are all products we excel in providing to our clients. One key differentiator between TAG-IT and other integration firms is that we use the very same technologies in our own data center that we offer to our clients. We invite you to come see how we are using these technologies to help our clients stay compliant, while at the same time increasing their productivity and saving them both time and money. Please feel free to visit our web site at <http://www.go-tag.net> for more information.

TAG-IT welcomes all of EOL's existing clients, and as a Provision Networks Solutions Advisor with the ongoing support of Paul and Peter Ghostine, will provide service immediately on March 31, 2008. If you have any questions, please feel free to contact our team at 1-877-365-TAG1 (8241) or TAGITSales@go-tag.net.

Kindest Regards,

Chip Burns
